

# INTRODUCTION TO IIESoc

Dhruv Dhody

Secretary of IIESoc, Senior System Architect at Huawei Technologies

## WHO ARE WE?

- IIE Soc (India Internet Engineering Society) is a non-profit entity that brings together different stakeholders from the computer networking community across industry, academia, service providers and government.
- It exists to further the adoption of IETF standards and increase awareness & participation in the IETF process.

# OUR MISSION

- To further the **adoption** of Internet standards in India.
- To increase **participation** in IETF standards activities.
- To conduct **capacity building** programs in the Indian networking community.
- The society will provide technical inputs in the **policy** area.
- To provide a forum for computer networking professionals, academicians, researchers, network operators and programmers to **discuss technical issues** in an Indian context.
- To **mentor** people to take on IETF leadership positions.
- Be the nodal agency for organizing **IETF in India**.

# OUR STRUCTURE

## Governing Council

- Runs day to day operations and executes on event plan for raising awareness/participation.

## Advisory Council

- Advises governing council on strategic issues and connects to various stakeholders.

## Focused Volunteer Groups

- Volunteer groups in specific cities execute on the ground events and seminars.
