Hello,

IIESoc have been working behind the scenes for Connections 2017 - a Pre-IETF100 forum to get protocol developers, academicians and network operators together on the same platform to discuss the latest problems facing the Internet and the solutions relevant to them. This is being done with a focus on India and Indian contributions to the IETF. You can find more about IIESoc at https://www.iiesoc.in/

The event consists of a full-day Conference on 8th November 2017 and a Hackathon on 9th November 2017. There are 4 tracks for the event (both conference and hackathon) - Applications, Security, Software Defined Networks (SDN) and Internet of Things (IoT).

We have star studded lineup of International and Indian speakers such as Fred Baker (former chair of IETF), Paul Wouters, Syam Madanapalli, Elliot Lear, Carsten Bormann, Vishnu Pavan Beeram and many more. See https://www.connections.iiesoc.in/speakers.

You can find out more information about the conference at https://www.connections.iiesoc.in/

You can buy the tickets for the conference at https://www.connections.iiesoc.in/tickets

See you there!
